Investor Presentation

Cautionary Note Regarding Forward-Looking Information and Non-IFRS Measures

This presentation is for information purposes only and shall not constitute an offer to buy, sell, issue or subscribe for, or the solicitation of an offer to buy, sell or issue, or subscribe for any securities. This presentation is not, nor is it to be construed under any circumstances as a prospectus, a public offering of securities, or an offering memorandum as defined under any applicable securities legislation. The information provided in this presentation is not intended to be a comprehensive review of all matters and developments concerning Horizon Copper Corp. (“Horizon” or the “Company”). It should be read in conjunction with all other disclosure documents of the Company. The information contained herein is not a substitute for detailed investigation or analysis. No securities commission or regulatory authority has reviewed the accuracy or adequacy of the information presented.

Except for the statements of historical fact contained herein, the information presented constitutes “forward-looking statements”, within the meaning of the Private Securities Litigation Reform Act of 1995 and applicable Canadian securities legislation, concerning the business, operations and financial performance and condition of the Company. The forward-looking information contained herein may include, but is not limited to, information with respect to: the state of the financial markets for Horizon’s securities; the state of the natural resources sector; recent market volatility and potentially negative capital raising conditions; Horizon’s ability to be fully able to implement its business strategies; the ability of the Hod Maden Project to obtain project level financing or on terms that are acceptable and the residual amount of equity financing to be provided by the Company; the projected capital costs and development timelines for the Hod Maden Project; SSR Mining’s ability to fulfil its role as operator of the Hod Maden Project, including social and regulatory license to operate; the expectation that the terms of the earn-in milestone payments of SSR Mining’s agreement to acquire a 40% operating interest in the Hod Maden Project will be fulfilled, including the related expectation of benefits to the overall development of the project with SSR Mining as the operator; the expected production at Antamina and amount of the Antamina NPI, the intention and ability to increase processing capacity at Antamina and that the investment will be made to extend the mine life and the timing of those investments; the expected timing of underground development on the Entrée/Oyu Tolgoi JV Property and timing and amount of subsequent cash flows attributable to Entrée; the future price and demand of gold, copper, and other metals; the estimation of mineral reserves and resources; realization of mineral reserve estimates, business prospects and strategies; anticipated trends and challenges in Horizon’s business and the markets in which it operates; Horizon’s financial position; the expectation that trading on OTCQX will enhance the visibility and accessibility of the Company to U.S. investors; as well as those factors discussed in Horizon’s annual report for the financial year ended December 31, 2023 and the Company’s Annual Information Form dated March 27, 2024 available at www.sedarplus.ca. and other risks and factors that Horizon is unaware of at this time. Forward-looking statements are made based upon certain assumptions and other important factors that, if untrue, could cause the actual results, performances, or achievements of Horizon to be materially different from future results, performances or achievements expressed or implied by such statements. Such statements and information are based on numerous assumptions regarding present and future business strategies and the environment in which Horizon will operate in the future, including, but not limited to, the price and demand of copper and gold and anticipated costs. Certain important factors that could cause actual results, performances or achievements to differ materially from those in the forward looking statements include, amongst others, failure to receive, renew or retain necessary approvals or permits, changes in business plans and strategies, changes in capital expenditures required for project development, market conditions, share price, best use of available cash, gold and other commodity price volatility, discrepancies between actual and estimated production, mineral reserves and resources and metallurgical recoveries, regulatory restrictions, activities by governmental authorities (including changes in taxation), currency fluctuations, the global economic climate, dilution, share price volatility and competition. Forward-looking statements are subject to known and unknown risks, uncertainties and other important factors that may cause the actual results, level of activity, performance or achievements of Horizon to be materially different from those expressed or implied by such forward-looking statements, including but not limited to: the impact of general business and economic conditions, the absence of control over mining operations from which Horizon does not directly operate or receive royalties from, and risks related to those mining operations, including risks related to international operations, government and environmental regulation, actual results of current exploration activities, conclusions of economic evaluations and changes in project parameters as plans continue to be refined, risks in the marketability of minerals, fluctuations in the price of copper, gold and other commodities, fluctuation in foreign exchange rates and interest rates, stock market volatility.

Although Horizon has attempted to identify important factors that could cause actual results to differ materially from those contained in forward-looking statements, there may be other factors that cause results not to be as anticipated, estimated, or intended. There can be no assurance that such statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance on forward-looking statements.

Horizon does not undertake to update any forward-looking statements that are contained or incorporated by reference, except in accordance with applicable securities laws.

Horizon has included certain performance measures in this presentation. that do not have any standardized meaning prescribed by International Financial Reporting Standards (“IFRS”) including all-in sustaining cost per copper pound on a co-product basis. With respect to the Hod Maden project, the Company presents all-in sustaining cost per copper pound (“AISC”) on a co-product basis as it believes that certain investors use this information to evaluate the Company’s performance in comparison to other companies in the precious metals mining industry that present results on a similar basis. AISC per copper pound on a co-product basis is a non-IFRS financial ratio that uses AISC on a co-product basis, a non-IFRS measure, as a component. AISC per copper pound on a co-product basis is calculated by summing certain costs (operating costs, royalties, treatment, refining & transport costs, sustaining capital, G&A, and other costs) associated with the copper produced. The resulting figure is then divided by the payable copper ounces produced. For Hod Maden, the calculation is as follows: [(Operating Costs (\$135 million) + Royalties (\$53 million) + Treatment, Refining and Transport Costs (\$42 million)+ Sustaining Capital (\$23 million) + G&A (\$19 million) + Other Costs (\$12 million)] / Payable Copper Pounds (255 million pounds) = \$1.12/lb Cu AISC].

As there are no standardized methods of calculating these non-IFRS measures, the Company’s approach may differ from those used by others, and accordingly, the use of these measures may not be directly comparable. Accordingly, these Non-IFRS measures are intended to provide additional information and should not be considered in isolation or as a substitute for measures of performance prepared in accordance with International Financial Reporting Standards. Note these figures have not been audited and are subject to change.

QUALIFIED PERSON

Imola Götz (M.Sc., P.Eng.), Sandstorm Gold Ltd’s Vice President, Mining & Engineering is a Qualified Person as defined by Canadian National Instrument 43-101. She has reviewed and approved the scientific and technical information in this presentation.

Diversified Exposure to the World's Leading Copper Mines

- Portfolio of interests in low-cost, high-quality copper mines
- Cash-flows levered to rising copper prices
- Built-in growth and significant financing flexibility for future acquisitions

Global Copper Demand¹

— Refined Copper Supply

Copper supply deficit of over **10 million** tonnes is anticipated by 2035

Copper demand related to the energy transition

Energy Transition is Driving Global Copper Demand

Junior Copper Company

Major Copper Portfolio

1.66% Net Profits Interest¹

24% Entrée Resources Equity

30% Non-Operating Interest²

Antamina

The world's 3rd largest copper mine³

CASH FLOWING

Oyu Tolgoi

Expected to be the world's 4th largest copper mine by 2030⁴

PRODUCING

Hod Maden

One of the lowest-cost copper-gold projects in development

EARLY WORKS

1) Before Antamina Silver Stream servicing and Sandstorm Antamina Residual Royalty payment.

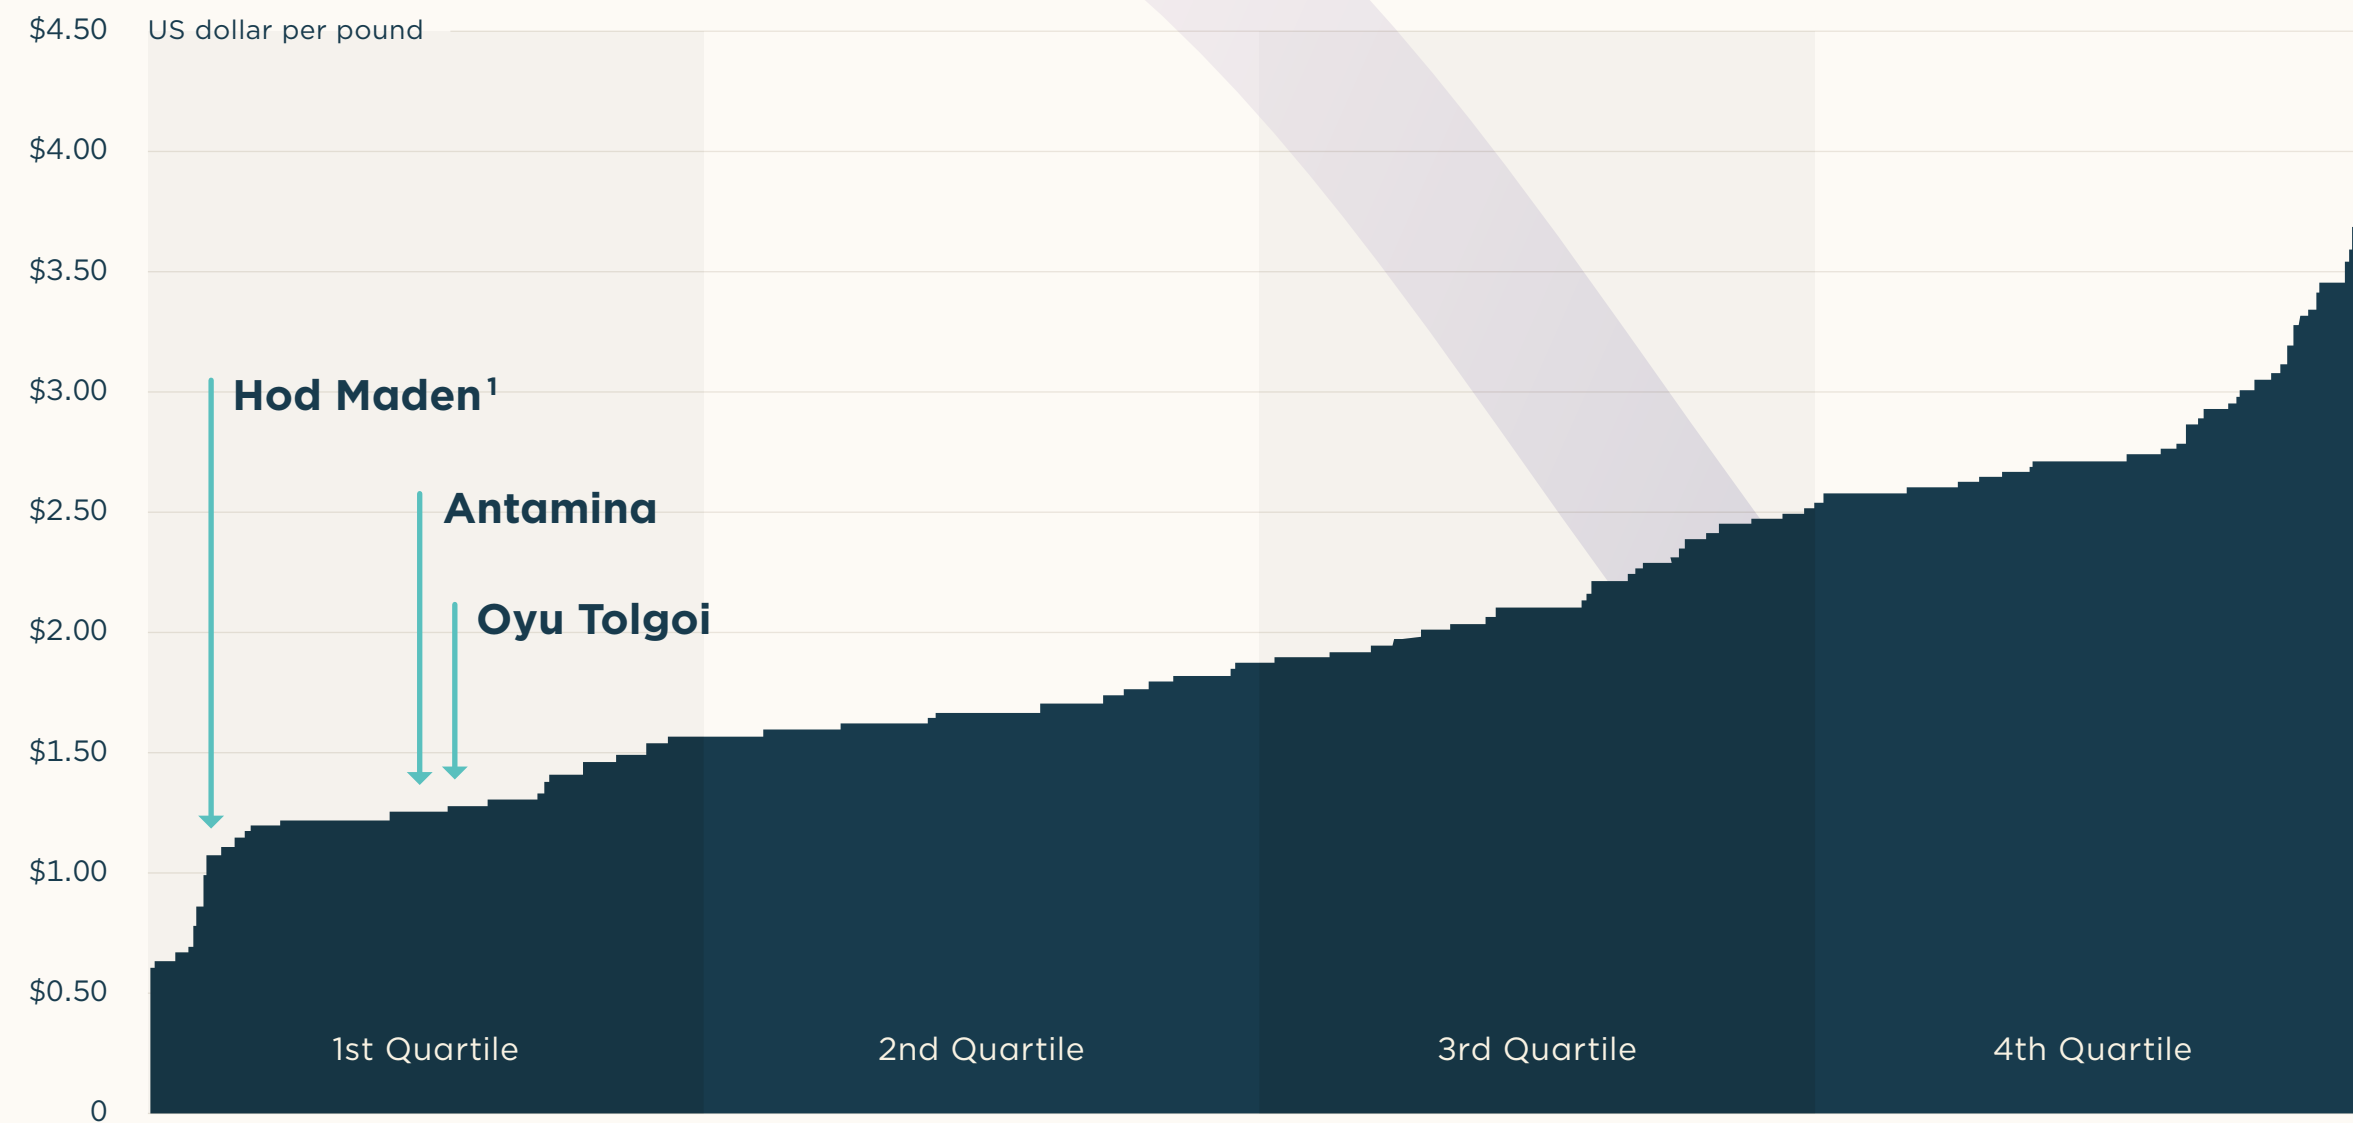

2) Less Gold Stream payable to Sandstorm Gold Royalties.

3) S&P Global: 2023 actual production of top global copper mines on copper equivalent basis.

4) Once all three Lift 1 Panels are in full production (approx. 2030).

Focused on Low-Cost Copper Operations

Total Cash Cost

1) Refer to Non-IFRS Measures on Page 2.

Cost curve source (including Antamina): S&P Market Intelligence. 2023 Copper Total Cash Cost; Hod Moden ASIC based on 2021 Feasibility Study (AISC Co-product basis per Cu lb); Oyu Tolgoi AISC based on Hugo North Extension 2021 Technical Report (ASIC before credits per Cu lb).

TECK

GLENCORE

BHP

MITSUBISHI

PERU

Antamina

1.66% NPI¹

The 3rd largest copper mine in the world² producing ~560,000 copper equivalent tonnes per annum

EXTENDING OPERATIONS THROUGH 2036 AND BEYOND

- Modified Environmental Impact Assessment granted in February 2024³ resulting in \$2B, 8-year investment in mine optimization
- Extends permitted pit depth by 150m, allowing operations through 2036 with no cash outlay from Horizon
- Permits consider potential throughput expansion

ANTAMINA TOPOGRAPHY⁴

1) Before Antamina Silver Stream servicing and Sandstorm Antamina Residual Royalty payment.

2) S&P Global: 2023 actual production of top global copper mines on copper equivalent basis

3) See Compañía Minera Antamina SA's press release dated Feb 15, 2024 and Teck Resources' press release dated Feb 21, 2024.

4) Source: Teck Resources; Franco Nevada. Topography shown prior to 2001 commercial production. Pit shells reflect reserve and resource estimates as at Dec 31, 2014.

Measured and Indicated Resources, inclusive of Reserves, total 900Mt, effective December 31, 2023. Proven and Probable Reserves were 226Mt, effective December 31, 2023. (Source: Glencore plc).

A Copper Investment Like No Other

- Diversified portfolio of industry-leading copper assets
- Leverage to rising copper prices
- Built-in growth from low-cost, high-quality mines
- Strategic debt provides financing flexibility and torque to equity holders

Leadership

Erfan Kazemi

PRESIDENT & CEO

Raised approximately one billion dollars in equity and debt financing as CFO, Sandstorm Gold Royalties.

Recognized as Canada's Top 40 Under 40, Canada's 50 Best Executives, and one of Canada's Finalists for CFO of the Year.

Craig McMillan

CFO

Former Senior Partner within the mining industry Assurance practice at PwC Canada.

CPA with experience working with numerous international mining companies on capital market transactions as well as regulatory compliance.

H. Clark Hollands

DIRECTOR

CEO of HB Strategies—a private investment company—and former International Tax Partner with KPMG with over 30 years of experience in financial analysis.

Patricia Mohr

DIRECTOR

Economist and commodity market specialist with over 30 years of experience.

Justin Currie

DIRECTOR

Seasoned senior business leader who has held with various senior management positions across multiple industries.

Bianca Goodloe

DIRECTOR

Managing Partner and founder of Goodloe Law and adjunct professor at NYU and UCLA with extensive experience in film finance, entertainment law and intellectual property.

Nolan Watson

CHAIRMAN

Founded Sandstorm, one of the world's largest precious metals royalty and streaming companies.

Recognized by the World Economic Forum as a Young Global Leader, Canada's Top 40 Under 40, and recipient of the Queen's Diamond Jubilee Medal.
