CAUTIONARY STATEMENT

CAUTIONARY STATEMENT

This presentation may contain forward-looking statements that are not historical facts. Forward Looking Information includes, but is not limited to, disclosure regarding possible events, conditions or financial performance that is based on assumptions about future economic conditions and courses of action; the timing and costs of future exploration activities on RUA GOLD ("RUA") properties; success of exploration activities; permitting timelines and requirements; requirements for additional capital; environmental requirements; planned exploration and development of properties and the results thereof; planned expenditures and budgets and the execution thereof. Often, but not always, forward-looking statements can be identified by the use of words such as "expects," "plans," "estimates," "intends," "believes," "could," "might," "will", "budget", "scheduled", "forecasts", "anticipates", "potential", "base case" or variations of such words and phrases or statements that certain actions, events or results "may", "could", "would", "might" or "will be taken", "occur" or "be achieved". Forward-looking statements involve known and unknown risks, uncertainties, and other factors which may cause the actual results, performance, or achievements of RUA to be materially different from any future results, performance, or achievements expressed or implied by the forward-looking statements. Forward looking statements or information relates to, among other things, RUA's corporate strategies, mineral resource estimates and plans for further exploration, which will require additional funding. These forward-looking statements are based on management's current expectations and beliefs (including the belief in the accuracy of the resource estimate) but given the uncertainties, assumptions and risks, readers are cautioned not to place undue reliance on such forward-looking statements or information. Information in this presentation is not intended to be a comprehensive review of all matters and developments concerning RUA and RUA GOLD does not assume any obligation to update, or to publicly announce, any such statements, events or developments, except as required by law.

For additional information on risks and uncertainties, see RUA's most recently filed annual management discussion & analysis ("MD&A"), which is available on SEDAR at www.sedar.com and on RUA's website at www.ruagold.com. The risk factors identified in the MD&A are not intended to represent a complete list of factors that could affect RUA GOLD.

COMPLIANCE WITH NI 43-101

The technical information in this presentation (the "Technical Information") has been approved by Simon Henderson, COO and Director for RUA GOLD and a Qualified Person under NI43-101 definitions. For readers to understand the information in this presentation, they should read the technical report (available www.sedar.com) in its entirety (the "Technical Report"), including all qualifications, assumptions and exclusions that relate to the information set out in this presentation that qualifies the Technical Information. The Technical Report is intended to be read as a whole, and sections or summaries should not be read or relied upon out of context. The Technical Information in the Technical Report is subject to the assumptions and qualifications contained therein.

Some of the mineral resources at the RUA GOLD Properties are categorized as indicated and some as inferred mineral resources. Mineral resources that are not mineral reserves do not have demonstrated economic viability. Mineral resource estimates do not account for mineability, selectivity, mining loss and dilution. These mineral resource estimates include inferred mineral resources that are normally considered too speculative geologically to have economic considerations applied to them that would enable them to be categorized as mineral reserves. There is also no certainty that these inferred mineral resources will be converted to measured and indicated categories through further drilling, or into mineral reserves, once economic considerations are applied.

New Zealand is Open for Business

A Rich History of **High-Grade Gold** in an Emerging Jurisdiction

RUAGOLD

Highly Prospective Geology

40M+ oz. Au

NZ's rich production history

Active Mining Industry

Fast Track

NZ Government's new fast-track approvals bill to expedite mining approvals and permits.

2x Exports

Pro-mining Government's 10-year goal to double mining exports.

The Team: **A Legacy of Creating Value**

RUA**GOLD**

RUA GOLD's team is driving an **aggressive and focused strategy** to capitalize on New Zealand's gold mining potential, recognizing the unparalleled opportunities in their projects.

RUA GOLD's team has the experience to extract New Zealand's high-grade gold, having achieved:

In Capital Raised

\$2.2B+

Mines Into Production

8 Mines

In Exits

\$11B+

Experience in
Gold Mining Projects

150+ Years

Board and Management

RUAGOLD

Chairman

Oliver Lennox-King

Former Chairman of Fronteer Gold and Roxgold with combined +\$3B in exits. Largest shareholder of RUA GOLD.

Director

Paul Criddle

CEO of Capricorn Metals and previously COO of Roxgold. Built and managed multiple gold mines across Australia and Africa.

Director

Mario Vetro

Owner of Commodity Partners. Previously co-founder of K92 Mining. Extensive experience in structuring and advising resource companies.

Director

Tyron Breytenbach

CEO of Lithium Africa Resources, formerly SVP Capital Markets at Aris Mining and Managing Director of Cormark Securities. Geologist with experience in operations and capital markets.

CEO

Robert Eckford

Previously was co-founder and CFO of Aris Mining. Experience in mining across Australia, Africa and South America.

COO

Simon Henderson

Exploration Geologist and specialist in orogenic and epithermal gold systems. Has a long history and strong relationships in New Zealand's with stakeholders.

CFO & Corporate Secretary

Zeenat Lokhandwala

Former CFO of Great Bear Royalties and Director of Finance of Great Bear Resources. Experience in M&A, finance and accounting.

Director

Brian Rodan

43+ years of experience; currently serving as Fellow of the Australian Institute of Mining and Metallurgy Founder and Chairman of Siren Gold

NORTH

Historic Production of the Reefion Goldfield

RUAGOLD

✓ Development of the Blackwater Mine (Snowy River Project) demonstrates continuity of **gold mineralization to 1,500m** and potentially beyond

✓ Blackwater provides a blueprint for the RUA combined land package to have the **value of 7x "Blackwaters"**

REEFTON GOLDFIELD

Historic Mine Sites

RUAGOLD

Active Drilling Program: **Auld Creek**

RUAGOLD

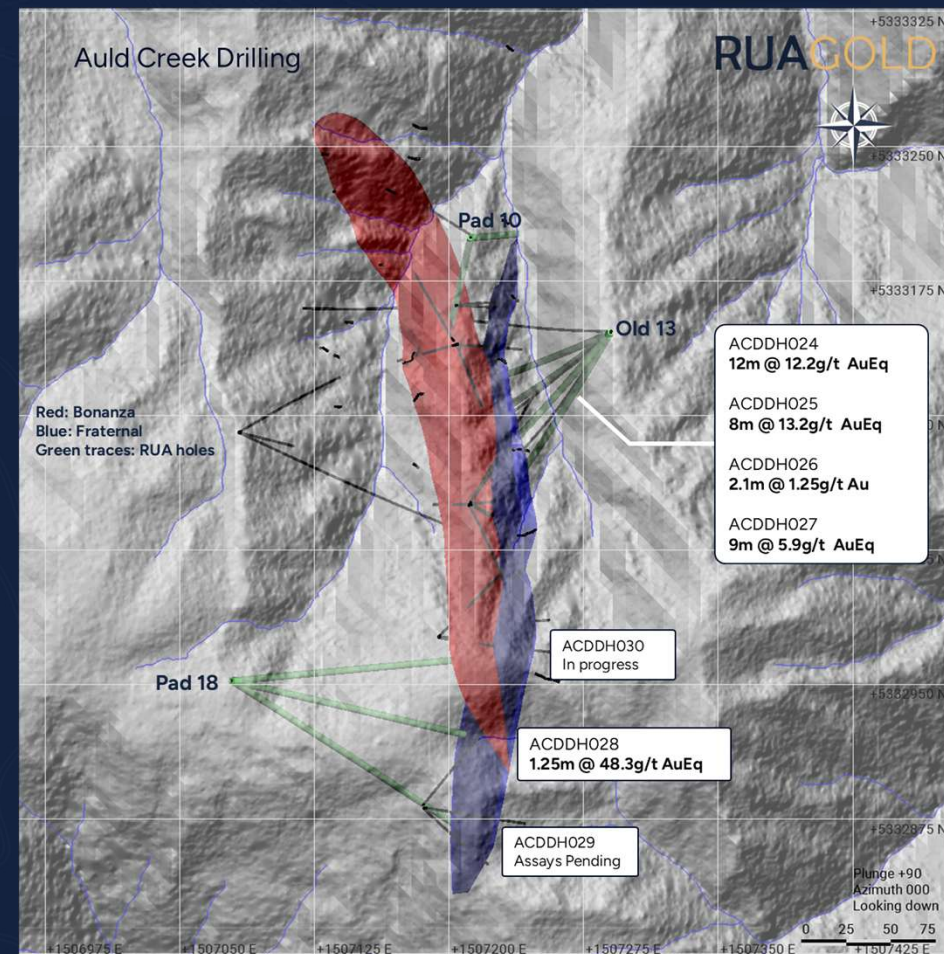

New Zealand's largest antimony resource
Current resource at this target is 110k @ 5.2g/t AuEq.

The goal for 2025 is to build inventory of gold ounces and antimony tonnes.

Current phase of drilling commenced in December 2024.

Recent assays (all within 150m of surface):

- ACDDH024: 12m @ 12.2g/t AuEq (1.9g/t Au & 2.4% Sb)
- ACDDH025: 8m @ 13.2g/t AuEq (2.2g/t Au & 2.2% Sb)
- ACDDH026: 2.1m @ 1.25g/t Au
- ACDDH027: 9m @ 5.9g/t AuEq (5.2g/t Au & 0.16% Sb)
- ACDDH028: 1.3m @ 48.3g/t AuEq (13.3g/t Au & 8.1% Sb)

Gold equivalent formula is based on AuEq = Au g/t + 4.3 x Sb% using a Au price of US\$2065/oz, Sb price of US\$34,300 per tonne and 85% recovery.

Active Drilling Program: Cumberland

RUAGOLD

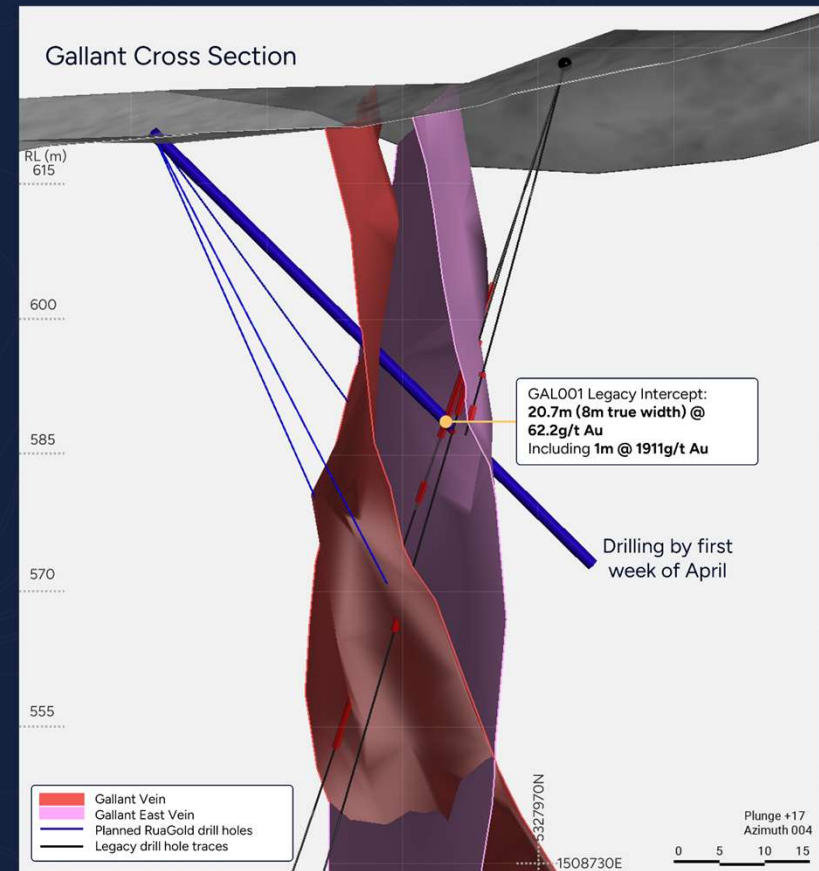

RUAGOLD's #1 ranked VRIFY AI target.

Following up on a previously reported 20.7m @ 62.2 g/t Au (incl 1m @ 1,911 g/t Au (60oz/t)).

Drilling commenced in April, results expected by end April/early May.

The Cumberland structural zone has emerged as a standout target from the early stages of the Company application of the VRIFY AI tool.

We will systematically test the remainder of the Cumberland gold camp targeting the 7 historic mines in a 2.2km long north-northwest trending zone of quartz veins and shearing.

REEFTON GOLDFIELD

A forgotten historic gold mining district

Now **RUA GOLD** is back as the dominant player
