**Symbol:** TSXV: CN | OTCPK: CNRIF

**Market Cap:** 25M

**Sector:** Mining

**Purpose:** Raise Awareness / Open Market Buying

Condor Resources (CN.V, \$25M market cap) as an explorer, leaving the project generator model behind, with two substantial projects in Peru that are each of a scale that can attract major miners in the future.

1. Pucamayo is a high-sulfidation epithermal gold (and poly-M) target under a 6 sq km lithocap alteration with some historical drilling that validates our thesis that this has multi-million-ounce potential
2. Huinac Punca is a high-grade silver CRD target 65km from Antamina with grab samples >100 g/t G and some >3,000 g/t Ag over a 1km outcrop
3. Quinton Hennigh is on the board and a large supporter of the project
4. We have JV'd our Cobreorco project with Teck, a porphyry-skarn outcropping at surface along a 2.5km anomaly, and Teck is actively exploring there – a free catalyst for Condor

On the back of receiving drill permits at each of Pucamayo and Huinac Punta, both expected very shortly, we will be planning drill programs at both for later this year and into early next.

## **Chris Buncic – CEO**

Chris Buncic is an accomplished executive with over 24 years in a diverse career that spans senior roles in the mining industry and capital markets.
