

Highway 50 Gold Corp.

Symbol: TSXV: HWY

Sector: Resource

Purpose: Raise Awareness / Open Market Buying

Highway 50 Gold Corp. is a Nevada-focused gold exploration company targeting the discovery of a major Carlin-type gold system in north-central Nevada, one of the world's most prolific gold-producing regions. The Company is led by a veteran team of engineers and geoscientists with decades of Nevada experience, including the discovery and successful transaction of White Knight Resources and Mansfield Minerals, both of which advanced into currently producing gold mines. Management has deliberately assembled a portfolio of 100%-owned, drill-ready properties positioned in the same crustal settings and structural windows that host Nevada's largest gold deposits. With defined drill targets and planned drilling, Highway 50 Gold offers investors leveraged exposure to a potential new Carlin-style discovery.

Investor Highlights:

- **Drill-Ready Nevada Exposure:** Two Tier-1 exploration projects with shallow, high-priority drill targets in one of the world's most productive gold jurisdictions.
- **Proven Mine-Finding Team:** Management and technical team with decades of experience and multiple company sales, including discoveries now in production.
- **Strong Leverage to Discovery:** 100% project ownership, large surface gold anomalies, compelling Cortez-style geological analogues, and a fully funded 2026 drill program.

Gord Leask, CEO

35+ years exploration experience • Founder and director of White Knight Resources, sold in 2007 • Founder and former President of Goldrock Mines, sold in 2016 • Director of Pachamama Resources, merged with Regulus Resources in 2012 • Former director of Aldebaran Resources
