

EMINENT GOLD

Eminent Gold Corp.

Symbol: TSXV: EMNT | OTCQB: EMGDF

Sector: Mining | Gold

Purpose: Raise Awareness / Open Market Buying

[Investor Presentation](#)

Eminent Gold is a high-conviction Nevada gold explorer advancing a potential new Carlin-style gold trend on its 100%-owned Hot Springs Range Project (HSRP), located just 15 km northwest of the 50-million-ounce Getchell Trend.

Backed by Kinross Gold, which recently increased its strategic ownership to 13.8%, the Company is drilling what could emerge as the next district-scale oxide gold system in one of Nevada's most prolific corridors. Led by a proven multidisciplinary team with multiple gold discoveries to its credit, Eminent is combining fresh geological thinking with deep Great Basin expertise.

Key Projects

- Hot Springs Range (HSRP) — Flagship project hosting a new oxide Carlin-style discovery. Recent drilling at the Otis target delivered 9.2m @ 3.2 g/t Au (including higher-grade intervals on previous holes), with all holes intersecting significant mineralization. A 10,000m RC drill program is commencing in April 15, 2026 to test extensions and new targets along the emerging trend.
- Celts — Silicon-type analogue in the Walker Lane. Permitted and drilling Q3.
- Gilbert South — High-grade bonanza vein system, also in the Walker Lane. Permitted.

Investor Highlights

- Kinross Gold increased stake to 13.8% following encouraging drill results, signaling strong strategic support

- New oxide Carlin-style gold discovery (9.2m @ 3.2 g/t Au) in a previously untested corridor, with potential to define a new parallel trend to the Getchell
- Aggressive follow-on drilling underway at HSRP with multiple targets that mirror the structural and geochemical signatures of Nevada's richest Carlin deposits
- Celts and Gilbert South provide near-term additional drill catalysts in the gold-endowed Walker Lane
- Tight share structure, high insider ownership, and multiple near-term catalysts across the portfolio

Daniel McCoy, PhD Geology

President, CEO, Chief Geologist & Director

Dr. Dan McCoy has worked extensively in the mineral sector for over 30 years, specializing in precious metals exploration, primarily in North and South America, and in Africa. Dr. McCoy was the President and CEO of Keegan Resources Inc. (2004-2010), where he led the acquisition and discovery team that discovered the 5-million ounce Esaase Deposit, which Asanko Gold is now actively mining. He served as Chief Geologist at Cayden Resources Inc. (2010-2014), where he led the acquisition and exploration teams that unveiled the value of the El Barqueño project in Mexico, leading to the company being acquired by Agnico Eagle Mines Ltd. in 2014. Dr. McCoy has also served as an independent director for Auryn Resources Inc., director of Keegan and Cayden Resources, and has served as Chief Geologist for Torq Resources Inc. Prior to working in the junior sector, Dr. McCoy served as Senior Geologist at Placer Dome (1996-2004), where he coordinated acquisitions and field programs for Placer's US generative exploration group. From 1992 to 1995, he was a teaching and research associate at the University of Alaska, Fairbanks. He has also worked various contract jobs throughout the continental US and Alaska for companies such as Newmont, Cominco and Noranda prior to acquiring his Ph.D.
