

Pulsar Helium Inc.

Symbol: TSXV: PLSR | OTCQB: PSRHF | AIM: PLSR

Sector: Helium

[*Pulsar Helium Investor Presentation*](#)

Pulsar is a primary helium company listed/quoted in Canada (TSXV:PLSR), the United Kingdom (AIM:PLSR) and the USA (OTCQB:PSRHF). Its flagship Topaz Project in Minnesota, USA, the Jetstream #1 well had an average concentration of 8.1% helium during flow testing. Commercially viable helium project concentrations begin @ 0.3%.

Investor Highlights

Multi-Project Portfolio: Pulsar boasts four high-impact, primary helium projects with exceptional development potential.

Multiple Commodities: The flagship Topaz Project in the USA contains helium, the rare isotope helium-3, and carbon dioxide.

Development Strategy: De-risking the portfolio and advancing discoveries to production to create value for all stakeholders.

Trending Commodity: Primary helium is rare, and its increasing demand across multiple sectors is creating shortages and driving up prices.

Strong News Flow: Rapid development timeline ensures a consistent stream of news and updates.

Unique Experience: The team comprises experts who pioneered helium exploration, alongside seasoned commodity and finance professionals.

Thomas Abraham-James , Co-Founder & CEO

Co-founder Tom is a seasoned geologist with 17 years of experience specializing in the discovery and development of primary helium projects across North America, Africa, and Europe. He has pioneered helium exploration methodologies, coauthoring several influential publications, including "The Principles of Helium Exploration." Tom is a Fellow of the Australasian Institute of Mining and Metallurgy, the Geological Society of London (FSL), and the Society for Economic Geologists (FSEG).
