

## **Datametrex AI**

**Symbol:** TSXV: DM | OTC: DTMXF

**Sector:** Technology

[Investor Presentation](#)

Datametrex is a diversified technology and healthcare company delivering advanced AI, cybersecurity, digital payment solutions, and clinical services across Canada. Its defense-grade platforms, NexaIntelligence and NexaSmart, provide secure solutions for government and enterprise clients, while AnalyticsGPT transforms data into real-time, actionable insights through patented AI-driven reporting. The company also offers Nutanix-based hyperconverged infrastructure solutions and operates a patented cryptocurrency payment platform, Yuzupay. Complementing its technology portfolio, Datametrex runs healthcare clinics in Calgary and Edmonton, Alberta and Vancouver, British Columbia, integrating innovation with community-based care.

### **Investor Highlights**

- Proven, Patented AI & Cybersecurity Portfolio – Robust intellectual property portfolio including multiple USPTO patents and Canadian patents spanning AI-driven automation and digital payment technologies, supported by defense-grade platforms deployed across government and global enterprise environments.
- Diversified Revenue Streams – Exposure to high-growth sectors including AI analytics, cybersecurity, fintech (cryptocurrency payments), infrastructure solutions, and expanding clinical healthcare operations.
- Scalable, High-Margin Technology Model – Cost-efficient deployment, real-time data intelligence capabilities, and strong enterprise applicability across finance, healthcare, e-commerce, and defense markets.

### **Michael Kron, COO**

Michael Kron brings over 25 years of experience as a fintech entrepreneur and senior executive, blending payments, crypto, patent strategy, and corporate finance expertise. His proven track record building, scaling, and exiting technology companies – combined with deep leadership across mobile payments and IP-driven businesses – positions him to drive innovation and long-term growth.
