

Lithium Africa Resources

Symbol: TSXV: LAF

Sector: Resource - Lithium

[Investor Presentation](#)

Lithium Africa Corp. has an established 50/50 joint venture partnership with GFL International Co., Ltd. to jointly advance exploration in Africa (the “LAF-GFL JV”) and through the LAF-GFL JV, the Company has an indirect 50% interest in a portfolio of exploration assets in hard rock pegmatite districts across a number of prospective African regions covering Ivory Coast, Guinea, Mali, Morocco and Zimbabwe. For more information, please visit www.li-africa.com.

Investor Highlights

- Unique JV model with Ganfeng Lithium- a new paradigm for exploration
- First-Mover, district-scale footprint across Africa’s most underexplored pegmatite belts
- A pedigreed team of experienced explorers and scientists with capital market skills

Tyron Breytenbach, P.Geo

Chief Executive Officer

Tyron spent a decade in the mining industry as a geologist (specialized in resource estimation at Detour Gold) and then moved into international equity analysis at Cormark Securities & Stifel Canada.

Dr. Tom Benson

Advisor

Dr. Tom Benson is a Stanford Ph.D. volcanologist and globally recognized lithium exploration executive. As Vice President of Global Exploration at Lithium Argentina, he has led resource growth initiatives across some of the most significant lithium projects in the Americas. Previously at Lithium Americas, he played a key leadership role in the exploration and expansion of Thacker Pass, helping advance it into the largest lithium mineral resource globally. Dr. Benson brings deep technical expertise in lithium deposit formation and strategic exploration to Lithium Africa’s continent-scale spodumene portfolio.
